# SECUREFUEL<sup>SM</sup>

### Turnkey Implementation

One of the only solutions to leverage your truck's ECM, avoiding the need for additional hardware installation.

### Universal Solution

Works across 14,000+ EFS Network locations

### Unprecedented Protection

Catch unauthorized purchases by combining the truck's telematics with fleet card transaction data.

## MAKE THIS THE YEAR YOU TAKE CONTROL

Protect your fleet with SecureFuel<sup>SM</sup>, a revolutionary solution for catching unauthorized purchases in *real-time*.

Our SecureFuel solution provides complete transparency into how your fleet is purchasing and consuming fuel – all without interfering with your drivers' operations.

**Contact your EFS Account Executive today to learn more.**

## SecureFuel: Where fleet cards meet telematics.<sup>SM</sup>

How it works:

**Driver attempts to purchase fuel using the EFS Card**

**SecureFuel checks the truck's location and tank level** before securely authorizing purchase

**Proximity and tank reconciliation results made available to Carrier** upon purchase completion
